

# CARTON TRAX

STEEL AXLE PREMIUM CARTON FLOW

Free-floating axle spins independently of wheel with lower coefficient of friction and smoother, more reliable flow.

Sturdy design for lower maintenance costs.

Quick installation with no tools or hardware required.

Save on freight by shipping your complete carton flow project from one manufacturer.

Heavy-duty steel axle carton flow tracks

Abuse-resistant polyethylene rollers

Chromate coated axles provide greater corrosion resistance and smoother flow

Galvanized side channels

Perfect for freezer applications

Larger diameter wheels for more contact surface area

UNARCO

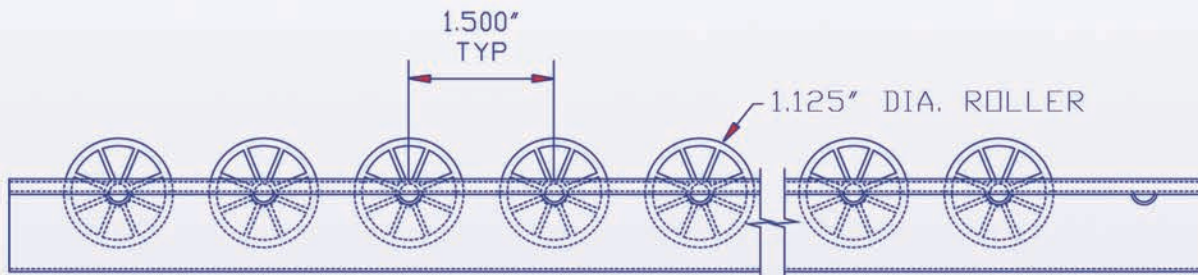

*It just flows better*
