**UNARCO MATERIAL HANDLING, INC., SPRINGFIELD, TN NAMES ROBERT
HOLMAN VICE PRESIDENT, ENGINEERING & PROJECT MANAGEMENT**

UNARCO, an industry leader in engineered warehouse and distribution center storage systems, has named a new Vice President to oversee Engineering & Project Management at Springfield, Tennessee manufacturing facility.

Springfield, Tenn. (January 15, 2014) – UNARCO Material Handling, Inc. announced the hiring of Robert Holman for the position of Vice President Engineering & Project Management. Holman bring years of engineering and operations management experience in a variety of industrial and consumer manufacturing environments and will be responsible for engineering functions at all three UNARCO plants.

President/CEO, Gary Slater, has tasked Holman with the collaboration of engineering and project management functions to streamline design output, accelerate production time and continue to advance UNARCO as a high-quality, low-cost leader in the material handling industry. Holman brings 17+ years of experience from previous companies such as NIC Global Manufacturing, France Power Solutions and Quality Industries. His previous involvement with every stage from tactical planning and design to new product implementation and production support will help strengthen UNARCO's position in the industry.

With plants in Springfield, TN, Pandora, OH, and Lewisville, TX, UNARCO pallet rack is part of some of the most complicated and highly-engineered distribution centers in the U.S., including multi-storey pick modules, rack supported buildings and highly automated AS/RS systems
