

CANTILEVER RACK

Cantilever Rack from UNARCO is designed to manage loads of varying length and proportion. Product is completely accessible from the front without any horizontal restrictions. The entire length of the cantilever rack may be used for storage. For added flexibility, loads of differing lengths may be stored in the same system, on the same level.

Storage Solutions For:

- Pipe
- Tubing
- Lumber
- Carpet
- Furniture
- Sheet Steel
- Doors
- Conduit
- Extrusions
- Siding
- Plywood

LONG-LENGTH PRODUCT STORAGE

FURNITURE RACK

OUTDOOR LUMBER RACK

Furniture items, such as sofas, can be easily removed with no frontal obstructions to damage product

Outdoor lumber yard storage with roof canopy

UNARCO CANTILEVER

EASY INSTALLATION

UNARCO's welded one-piece column and base allow for easy assembly. Cantilever arms can be installed on the ground with the column in the horizontal position using Key-Wedge pin connectors, and the entire system can be lifted in the vertical position. One UNARCO pin is equivalent to five, 5/8" bolts.

SINGLE-SIDED & DOUBLE-SIDED STORAGE

Cantilever rack columns are pre-punched on both sides for conversion from a single-sided to a double-sided unit as your storage needs change.

SLOTTED BASE DESIGN

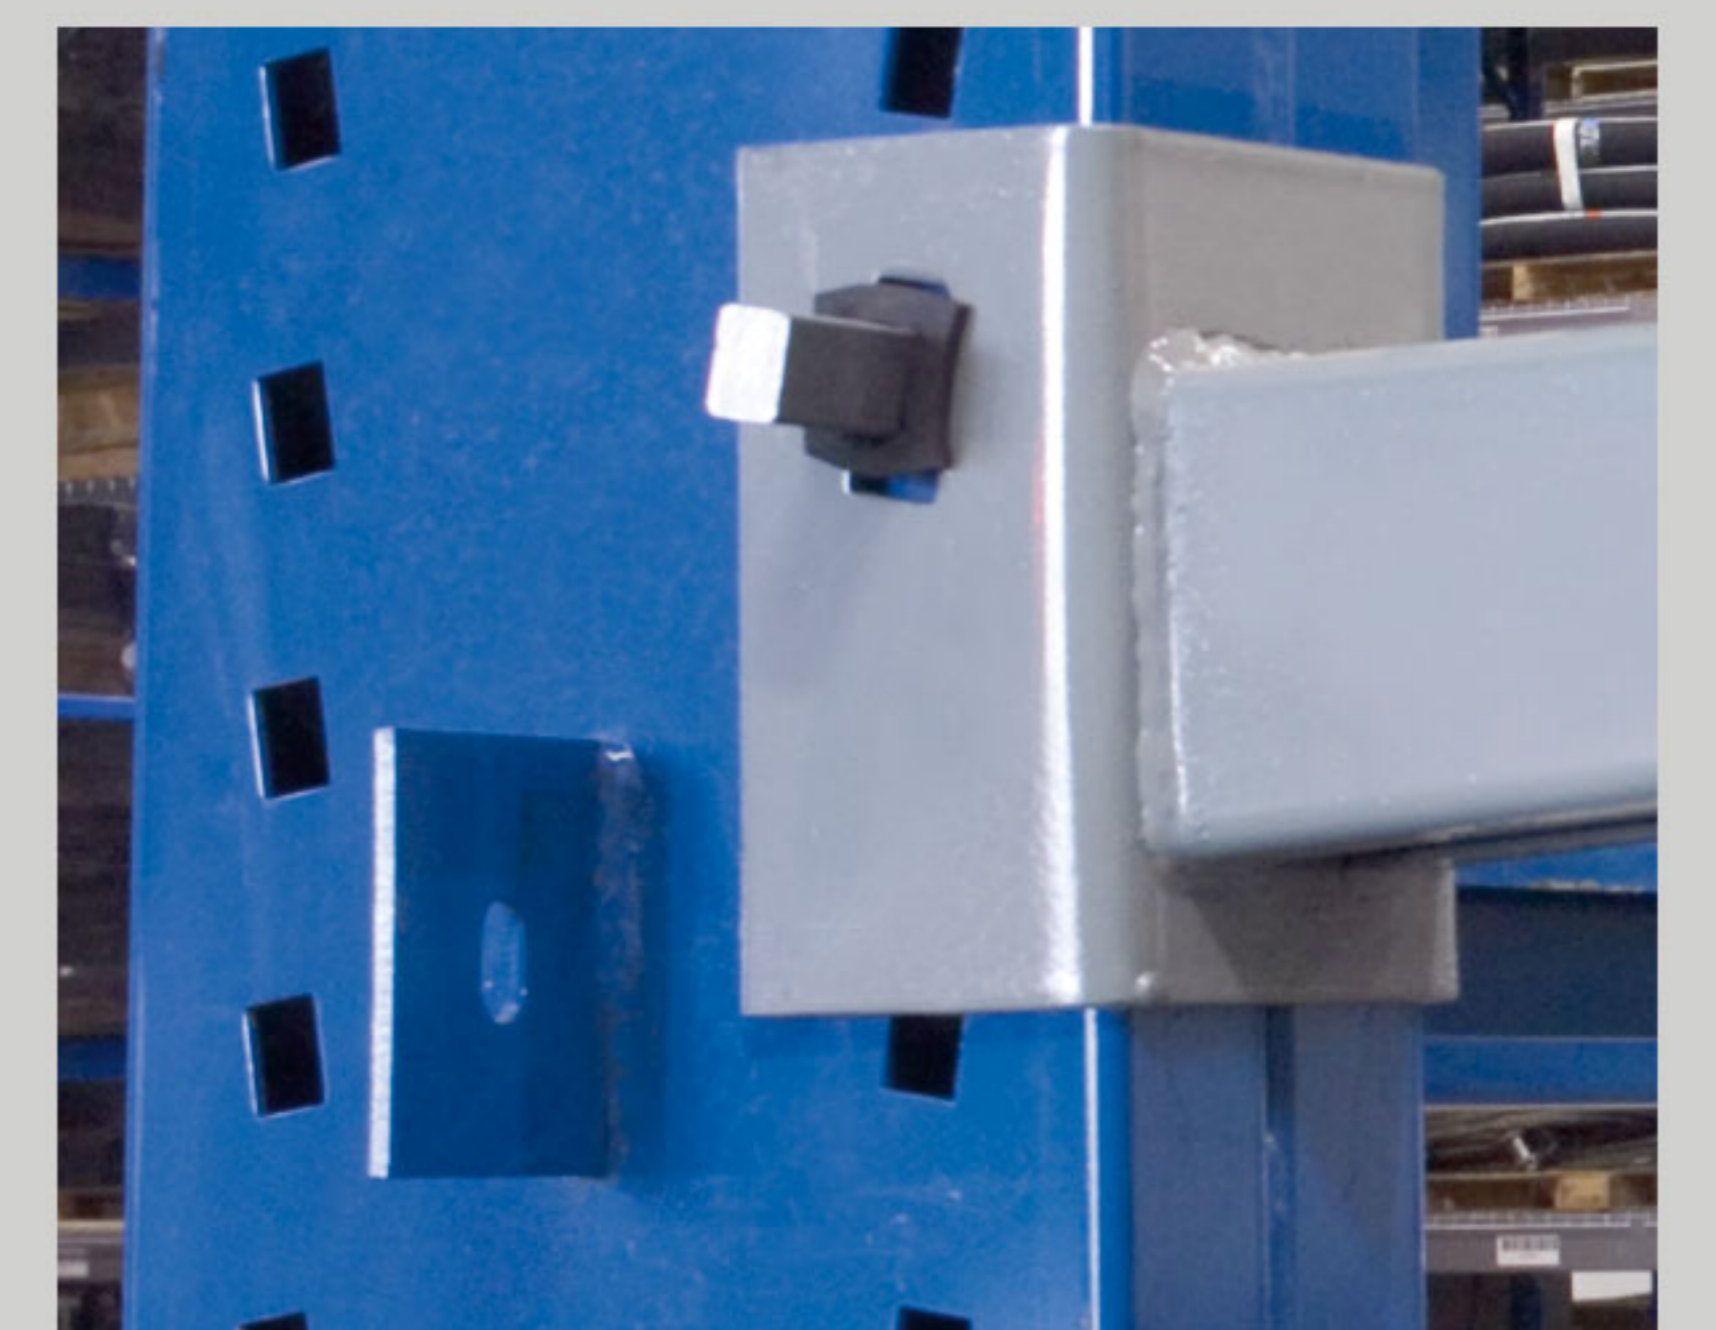

The UNARCO slotted base design minimizes aisle width, enabling the rail guide to be located inside the notched section of the cantilever rack perimeter and not in valuable aisle space.

STRENGTH & STABILITY

UNARCO's solid one-piece column design with completely welded column to base construction is rigid, stable and easy to install.

Tapered arms are adjustable on 3" increments

UNARCO Key-Wedge pin connectors have superior shear strength

Support beams can be designed for wood or wire decking placement
